

WASH'Nutrition Capacity Building

Exchanges on Material and Training around
WASH'Nutrition & Nutrition Causal Analysis Capacity
Building Strategies

Objectives of the Session

To present the material and training packages currently available on WASH'Nutrition and Nutrition Causal Analysis

To present the training material under process

To generate interest from the assistance to engage on finalizing e-learning material (technically and financially)

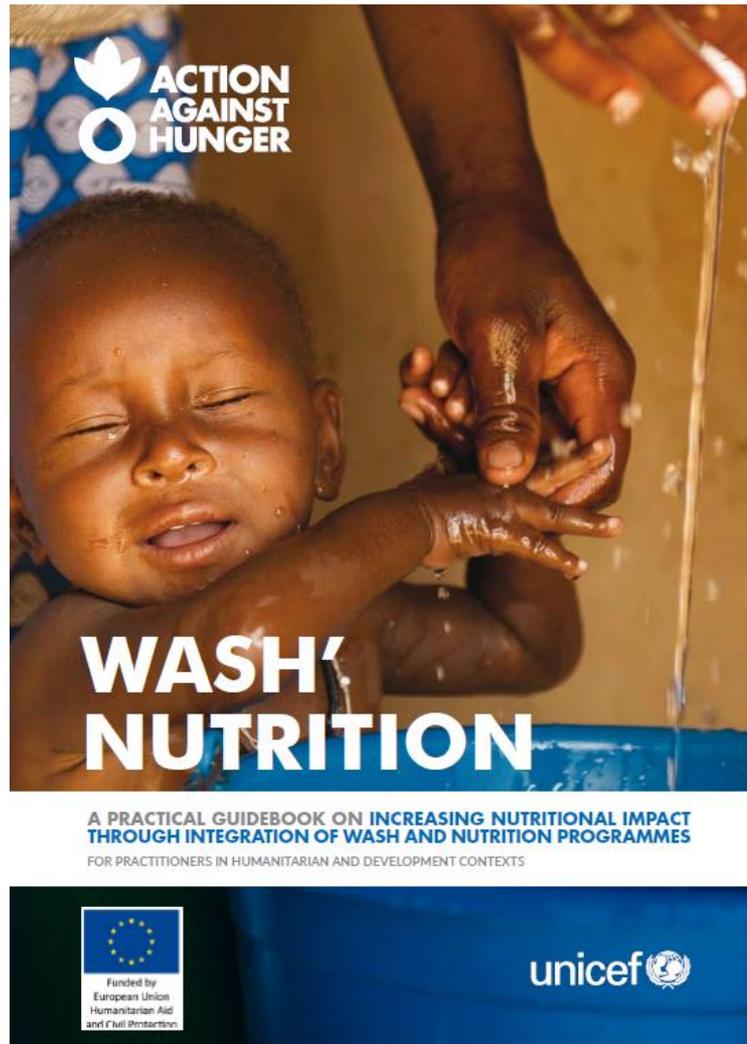

To exchange on the way the IFRC movement and more generally the participants see a capacity building strategy on WASH'Nutrition, in order to move on global and local partners training.

1 – WASH’NUTRITION

Material & Training (1)

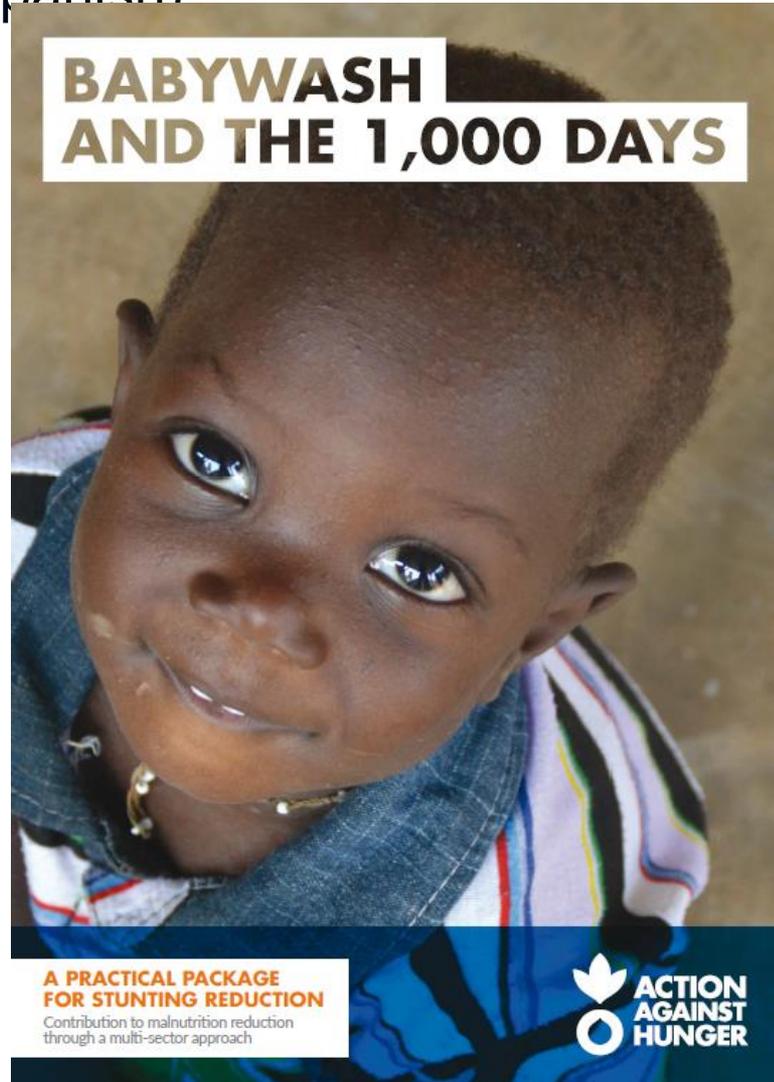

The WASH' Nutrition Guidebook (English, French)

→The Spanish and Arabic versions are under process

Material & Training (2)

The BABY WASH (English, Spanish)

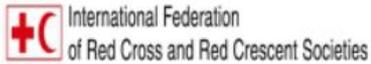

→The French version is under process

2 – NUTRITION CAUSAL ANALYSIS

Material & Training (1)

1 specific website: <http://linknca.org>

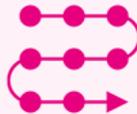

OVERVIEW

This document presents a general overview of the Link method for conducting a Nutrition Causal Analysis (NCA). It is intended to provide a global vision of the method before going through the detailed step by step guidelines.

A spanish version of the overview is available, please contact us if you would like more information.

DOWNLOAD

GUIDELINES

This document presents the field-tested Link NCA method for conducting a Nutrition Causal Analysis. It is intended to provide clear and practical step by step guidance to NCA Analysts and technical advisors.

Spanish and french version are also available.

DOWNLOAD

INDICATOR GUIDE : AVAILABLE UPON REQUEST

This guide is a compilation of already existing indicators to easily measure the key risk factors of under-nutrition. It includes a list of core indicators that are recommended in every Link NCA, their limitations and further guidance for field teams. This guide is useful for any multi-sectoral NCA survey.

PATHWAYS MODULE : AVAILABLE UPON REQUEST

This module is a scientific review of the causal association between key risk factors and different forms of under-nutrition. For each key risk factor, it provides a list of scientific studies and a short summary. It also includes a conclusion about the prevalence and persistence of the causal relation.

Material & Training (2)

- 28 Nutrition Causal Analysis studies compiled on the website
- 1 training package (1 week) in English, French and Spanish
- 3 to 4 training sessions (1 week each) delivered per year by ACF (global, regional or local): those sessions are delivered either to:
 - Focal points from missions / organisations engaging into a Link NCA
 - Analysts in charge of the coordination of the research

Discussion

- Do you want to engage technically (Peer review and visibility) and financially (modules 5 & 6 = in total 26,000 Euros) on supporting the training material (e-learning)?
- How can we elaborate a capacity building strategy to build global, regional and local partners capacity around WASH'Nutrition?
- Do you need any training about Nutrition Causal Analysis (Link NCA)?

Thank You...
