*Controlling and Preventing Disease:  
The role of water and environmental sanitation interventions*

WEDC, Loughborough University, UK.

ISBN Paperback 0 906055 90 3

Editorial contributions: Kimberly Clarke and Rod Shaw

Designed and produced at WEDC  
Layout: Karen Betts  
Illustrations: Ken Chatterton

# Contents

<b>Chapter 1: Introduction</b>	<b>1</b>
1.1 Definitions of commonly used terms in this manual	1
1.2 Who this manual is for	2
1.3 Scope of the manual	2
1.4 Structure of the manual	3
1.5 How to use the manual	4
<b>Chapter 2: Disease and disease transmission</b>	<b>7</b>
2.1 Introduction to the transmission cycle of disease	7
2.2 The pathogen	9
2.3 The host	10
2.4 Transmission of disease	13
2.5 The environment	21
2.6 The future host	24
<b>Chapter 3: Disease in the population</b>	<b>28</b>
3.1 Endemic and epidemic occurrence of disease	29
3.2 Introduction to epidemiology	33
3.3 Mortality and morbidity rates in a population	40
<b>Chapter 4: Water and environmental sanitation projects</b>	<b>42</b>
4.1 The price of poor WES	43
4.2 The planning of WES projects and the project cycle	44
4.3 Improving impact and sustainability	45
4.4 Health, poverty, and development	50
<b>Chapter 5: Domestic water supply</b>	<b>52</b>
5.1 Water availability	52
5.2 Water quality	60
5.3 Additional health issues concerning water supply	69
<b>Chapter 6: Sanitation</b>	<b>71</b>
6.1 The transmission of excreta-related infections	72
6.2 Practical issues on sanitation	78
<b>Chapter 7: Drainage</b>	<b>90</b>
7.1 Surface water and the transmission of disease	92
7.2 Practical issues concerning drainage	94
<b>Chapter 8: Solid waste management</b>	<b>99</b>
8.1 Solid waste management and infectious disease	99
8.2 Practical issues about solid waste management	100

<b>Annexe 1: Listing of diseases related to water and environmental sanitation</b>	<b>105</b>
Faecal-oral infections	107
Water-based helminths	142
Soil-transmitted helminths	155
Tapeworms	163
Weil's disease and Guinea-worm infection	167
Water-washed diseases	171
Vector-borne infections	234
<b>Annexe 2: Summary tables of infections related to water and environmental sanitation (excluding vector-borne infections)</b>	<b>235</b>
Table A2.1: Faecal-oral infections	236
Table A2.2: Water-based helminths	239
Table A2.3: Soil-transmitted helminths	240
Table A2.4: Beek and pork tapeworm	241
Table A2.5: Leptospirosis and guinea-worm infection	241
Table A2.6: Infections transmitted through direct contact	242
<b>Annexe 3: Summary tables of vector-borne infections, vectors and their control</b>	<b>243</b>
Table A3.1: Vector-borne infections with their vectors	244
Table A3.2: The vectors and their characteristics	246
Table A3.3: Preventative measures against vectors	248
<b>Annexe 4: Chlorination of drinking water</b>	<b>252</b>
Assessing whether the raw water can be chlorinated directly	252
The mother solution and chlorine-generating products	253
Determining the chlorine demand of the raw water	254
<b>Annexe 5: Calculating the size of pits for latrines, and assessing their infiltration capacity</b>	<b>258</b>
Determining the required size of a pit	258
Determining the infiltration capacity of the pit	259
<b>Annexe 6: Designing a simple stormwater drainage system</b>	<b>264</b>
Analysis of the catchment area	264
Determining the rainfall intensity for which the system is designed	265
Calculating the amount of water the catchment area will produce	266
Sizing a drain to cope with the design peak runoff rate	267
<b>Annexe 7: Priorities and standards in emergency situations</b>	<b>270</b>
<b>References</b>	<b>275</b>
<b>Alphabetical index of diseases</b>	<b>281</b>
